

ANILINOPYRIMIDINE DERIVATIVES AS IKK INHIBITORS AND
COMPOSITIONS AND METHODS RELATED THERETO

ABSTRACT OF THE DISCLOSURE

Compounds having activity as inhibitors of IKK are disclosed, particularly IKK-2. The compounds of this invention are anilinopyrimidine derivatives having the following structure:

wherein R₁ and R₆ are as defined herein. Such compounds have utility in the treatment of a wide range of conditions that are responsive to IKK inhibition. Thus, methods of treating such conditions are also disclosed, as are pharmaceutical compositions containing one or more compounds of the above compounds.
